Insider TA Professional and Standard (versions 4.0 through 6.0 only) use the Borland Database Engine, or BDE. The BDE is automatically installed by the Insider TA setup CD. But in the event your BDE installation gets corrupted, you do not need to re-install from the Insider TA CD. Download and run the following setup file.

Borland Database Engine (BDE)

In the worst case scenario to date, a "corrupt Corel Database engine" (Corel uses the BDE ...) might exist. The solution that was used was the following: 1. Uninstall the application (Visual dBASE 7) and Corel Suite 2. Re-start the computer 3. Delete the registry keys (REGEDIT) for Local Machine/Software/Borland/BLW32

BDE Configuration Error

An error occurred while attempting to initialize the Borland Database Engine (Error \$2108) I realize that the problem is that the BDE engine is not installed on my friend's PC. That's not really a big problem, since the table/database is not the main focus of the program, and only serves a minor function.

Solved: Borland Database Engine (Error \$2108) | Experts ...

To overcome this problem, Borland Database Engine has been created to perform BDL applications update. It is a valuable help to update BDL languages. It is mainly meant to update all programs and applications in BDL language. In addition, it can perform the update automatically. Once it has recovered the latest BDL version, it will install it at once.

Download the latest version of Borland Database Engine ...

Find the file BDEInst.cab in the BDE folder on your hard disk or on your Borland development tool (Delphi) CD. Use a program like WinZIP to extract the file BDEInst.dll from the CAB file. This DLL contains the Borland Database Engine along with a self-extracting installation program created by Borland. By letting this DLL do the dirty work, we make sure that the BDE is properly installed.

Installing the Borland Database Engine with DeployMaster

BDE Installer. Some applications use the Borland Database Engine to do data manipulation. Unfortunately, this DB engine is usually installed by the host application's installer, and not available as a separate install on its own. I discovered this the hard way when I did a Windows reinstall which broke an application that depended on BDE.. So I ended up looking for a stand-alone BDE installer, and here is what I found:

Borland Database Engine Installer

BDE - the Borland Database Engine If using the BDE, first of all you must move the configuration file (usually IDAPI32.CFG) outside the folder C:\Program Files (or equivalent according to your language locale), as Windows from version Vista and onwards will not allow applications storing data in this folder and below or in the C root.

Paradox and BDE tools
