Bosch Engine Control Unit

The electronic engine control unit (ECU) is the central controller and heart of the engine management system. It controls the fuel supply, air management, fuel injection and ignition. Due to the scalability of its performance, the control unit is also able to control the exhaust system as well as to integrate transmission and vehicle functions.

Electronic engine control unit - Bosch Mobility Solutions

As the main control unit, the electronic engine control unit is the heart of the engine management system. It controls fuel supply, air control, fuel injection, and ignition. Due to its scalability and enhanced performance, the control unit is also able to control the exhaust system, the transmission, and/or vehicle functions.

Motronic is the trade name given to a range of digital engine control units developed by Robert Bosch GmbH (commonly known as Bosch) which combined control of fuel injection and ignition in a single unit. By controlling both major systems in a single unit, many aspects of the engine's characteristics (such as power, fuel economy, drivability, and emissions) can be improved.
