Nikon Nikonos 5 Printed Manual - Printed Camera Manuals

The Nikonos V was for many years the industry standard professional underwater camera, but became obsolete with the advent of high-resolution digital photography (>4Mp). Nikon attempted to replace it in the early 1990s with the Nikonos RS-AF (Reflex System - Auto Focus), essentially an underwater F4, but the new camera was fabulously expensive and few could justify the cost.

Nikonos system history

The Nikonos 1I has a built-in bright-line viewfinder on top of the camera for use on land. The viewfinder image corresponds to the picture area of the 35mm lens. At a camera-to-subject distance as close as 2.75 feet (0.8m), however, a slight parallax is evident. In this case, compose with the aid of the parallax indicator lines in the viewfinder to

NIKONOS II - MIR

Nikonos V with close-up frame kit In this picture you can appreciate all of the fish at various distances in focus, although ISO speed was low and aperture wide, no flash, hence the blur. This other picture at lower depth had its DOF expanded by a smaller f-stop, due to higher ISO film speed and TTL flash use with an SB-103 speedlight

Nikonos V Review - Underwater photography

If course, the Nikon Nikonos III was designed to go 50m underwater, so it could cope easily with rainstorms, adventures and jungles. It was used widely for these pursuits and gained even more fame in the Vietnam War. In fact, the Nikonos was specifically designed to be useful above water as well, in order to increase its potential market.
