Area of Squares, Rectangles, and Parallelograms

Play this game to review Geometry. The figure is a parallelogram. Solve for x.

Parallelograms, Rectangles, Rhombi, and Squares Quiz - Quizizz

Any side of a parallelogram can be a base. A height can be drawn at any angle to the side chosen as the base. A base and its corresponding height must be perpendicular to each other. A height can only be drawn inside a parallelogram. A height can be drawn outside of a parallelogram, as long as it is drawn at a 90-degree angle to the base.

Grade 6 Mathematics, Unit 1.5 - Open Up Resources

In two-dimensional geometry, a parallelogram is a quadrilateral (a four-sided figure) with two pairs of congruent sides and two pairs of congruent angles. The following practice questions ask you to use the properties of parallelograms to find missing
