Grief vs. Traumatic Grief | Psychology Today

With traumatic grief, there is a dual challenge: coping with the trauma while also coping with the grief. In the beginning, trauma will overshadow grief. In many cases, this means that shock and disbelief will take hold at first, interfering with the normal grief process. These feelings of shock and disbelief will actually protect you.

7 Tips for Coping with Traumatic Grief - Funeral Basics

When grief goes on longer than is healthy or when it is overwhelming, a diagnosis of Traumatic Grief might be appropriate. It may be helpful to draw an analogy to a physical illness. An illness is not a characteristic of a person; it is a state a person is in at a given time. Many illnesses are very treatable.

Traumatic Grief | The National Child Traumatic Stress Network

Facilitating recovery from loss has been a staple of psychotherapy since long before the entity known variously as “complicated grief,” “traumatic grief,” “complicated bereavement,” “prolonged grief disorder,” or “pathologic grief” was identified as a form of suffering distinct from normal bereavement or depression.

Complicated grief therapy as a new treatment approach

The traumatic grief treatment approach described in this book integrates trauma- and grief-focused components in a sequential manner, such that once trauma symptoms have abated, the therapist helps the child and parent to resume a more typical grief process.
